EDUCATION

Johns Hopkins University, School of Advanced International Studies (SAIS) Washington, DC
Master of Arts in International Relations; International Economics and Finance 09/2021 - 05/2023

- **GPA:** 3.60/4.00 | **Relevant Coursework:** Econometrics; Corporate Finance; Impact Evaluation

Dickinson College Carlisle, PA
Bachelor of Arts in International Studies (JHU SAIS Cooperative BA/MA Program) 09/2018 - 05/2023

- **GPA:** 3.75/4.00 | **Minor:** Theoretical Mathematics
- **Relevant Coursework:** Real Analysis; Abstract Algebra; Discrete Math; Linear Algebra; Graph Theory; Logic

SELECTED EXPERIENCE

World Bank Washington, DC
Junior Professional Associate, Development Economics Asia (DECPA) 01/2026 - Present
Junior Professional Associate, Chief Economist Office, South Asia (SARCE) 11/2024 - 01/2026
Analyst Consultant, Chief Economist Office, South Asia (SARCE) 10/2023 - 11/2024

- Served as a coordination channel between the Director in Singapore and the DC-based RA team through three weekly planning meetings, translating research priorities into RA assignments and tracking deliverables.
- Architected AI-driven, LLM-based pipelines in **Python** to process 27 million job postings, mapping the global operational footprints and domestic origins of 400,000+ firms hiring in South Asia for the *South Asia Economic Update*, April 2026.
- Engineered robust fuzzy-matching algorithms in **Python** to perform entity resolution, mapping 400,000+ unstructured job-posting firms to standardized global registries to resolve naming inconsistencies for *South Asia Economic Update*, April 2026.
- Engineered a fully automated pipeline via **Stata** to ingest a 20-year panel of global product-level tariff data, cross-walking classifications to ISIC Rev. 3 to construct a regression-ready dataset for *South Asia Development Update*, October 2025.
- Designed a batch-processing framework integrating **PowerShell** and **Stata** to dynamically route file paths and harmonize labor force survey microdata across 100+ countries, establishing the data foundation for *World Development Report 2026*.
- Spearheaded the data analytical stream for the climate flagship, *From Risk to Resilience: Helping People and Firms Adapt in South Asia*, managing end-to-end quality control for 282+ analytical figures; engineered scalable **R (sf, terra)** workflows to integrate CMIP6 daily climate projections with firm and household-level survey microdata for spatial vulnerability assessments.
- Executed complex data cleaning and econometric regressions via **Stata**, integrating 100 million firm-level records with 40 years of daily historical India weather data to drive the core analytical framework for the published World Bank working paper, *Heat, Informality, and Misallocation: Firm Adaptation in the Short and Long Run*.
- **Award:** Received the 2025 SAR VPU Above and Beyond Award for outstanding contributions to flagship analytical reports.

Alpha Partners Management, LLC New York, NY
Summer Associate 05/2022 - 09/2022

- Screened and evaluated 50+ early-stage startups, synthesizing financial performance, market sizing, and business model viability to prioritize high-conviction investment opportunities.
- Conducted comprehensive commercial due diligence, including founder interviews and operational benchmarking, to deliver evidence-based investment theses for the deal committee.
- Developed data-driven trend forecasts and valuation models, presenting actionable investment insights to Managing Partners and a team of 15+ investment professionals.

HIGHLIGHTED PROJECTS

AI, Labor Markets, and Firm Productivity in Asia

Data Scientist / Lead Analyst

Washington, DC

04/2025 – Present

- **Research Coordination:** Lead data science and empirical research on AI exposure, labor demand, occupational change, and firm performance across developing Asia, coordinating analytical workflows across research assistants.
- **Large-Scale Firm Data:** Built a firm-level analytical database linking over 25 million online job postings from 430,000 firms with firm characteristics, ownership networks, and international business relationships to study AI adoption, labor demand, and firms' exposure to global markets.
- **Cross-Country Labor Markets:** Harmonized labor force survey microdata across 20 countries using ISCO and ISIC classifications to construct comparable worker-, occupation-, and industry-level measures of AI exposure and labor-market outcomes.
- **LLM and Text Analytics:** Developed LLM-based pipelines to transform unstructured text from over 400,000 job postings into structured research features and map more than 2,000 Detailed Work Activities to occupational benchmarks, constructing and validating measures of AI exposure and complementarity.
- **Econometric Analysis:** Developed reproducible workflows in Python, Stata, and R for large-scale data processing and econometric estimation, including high-dimensional fixed-effects models linking AI exposure to firm- and worker-level outcomes.
- **Flagship Research:** Contributed AI and labor-market research and empirical results incorporated into the World Bank's *World Development Report 2026*.

Green Growth in SAR: Economic Analysis of Regional Environmental Issues

Program Coordinator / Head Analyst

Washington, DC

10/2023 - 03/2026

- **Flagship Research Coordination:** Served as Head Analyst for *From Risk to Resilience*, coordinating research and analytical production across climate risk, household and firm adaptation, and urban resilience.
- **Climate Econometrics:** Integrated over 100 million firm-level observations with 40 years of historical weather data and conducted econometric analysis of climate shocks, adaptation, and firm performance in India.
- **Geospatial Analysis:** Combined climate projections, household and firm surveys, and spatial datasets to construct geospatial measures of exposure and adaptation to climate risks across South Asia.
- **Analytical Production:** Coordinated and quality-assured 282 charts, maps, and statistical outputs across the flagship program, ensuring consistency across research workstreams and publication readiness.
- **Academic Publication:** Co-authored "Climate Shocks and the Poor: A Review of the Literature," published in *Wiley Interdisciplinary Reviews: Climate Change* (2026).

TECHNICAL SKILLS

AI & Data Science: LLM pipelines, Agentic workflows, Fuzzy Matching, Scikit-learn, PySpark.
Data Analytics: Stata, R, Python, Databricks, Haver, Google Colab, Excel, Bloomberg, ArcGIS.
Geospatial: High-resolution spatial vulnerability assessments, Zonal Statistics, GIS Mapping.
